

# List of Questions for Cleanroom Certification and Testing

Please see my questions below. Thank you in advance. Or If you have a past report please send it to us and we will base our quote off of that if you wish.

1. Do you have a map of the cleanroom that you can provide that shows the square footage?
2. What is the ceiling height?
3. What ISO class does the cleanroom need to meet?
4. How many ceiling HEPA filters are in the cleanroom?
5. Do the ceiling HEPA filters need leak testing and airflow measured?
6. Do the ceiling HEPA filters have injection ports?
7. Do you need the room air exchange rate measured?
8. Do you need room pressure measured? If yes, how many doors are in the cleanroom space?
9. Do you need viable sampling performed? If yes, how many surface samples and how many airborne samples need to be taken? What standard do they need to meet?
10. Do you need compressed dry air or gas sampling?
11. Is there any equipment in the cleanroom that needs certified or calibrated? If yes, can you please provide an equipment list with make and model?
12. Do you need an airflow visualization study?
13. Any services you need that I did not mention?
